THE SPIRIT OF THE FOREST

Include radiografie di legni che evocano paesaggi. Il variabile ritmo ed il ciclo irregolare delle venature nel legno compongono una sequenza di paesaggi marini e terrestri, ora notturni, ora immersi nella nebbia o disegnati dal vento e dal sole diretto.

Da uno stesso fondo radiografico la mente distingue climi e caratteri a distanze continentali fra loro. Da vere radiografie di veri alberi: si percepiscono le venature come dune nel deserto, i nodi come astri solari e lunari, le crepe come paesaggi in tempesta. Ancora una volta l'immagine reale si trasforma con quozienti irreali di fantasia trasposta.

Nel ciclo dei legni di Meneghetti il colore ha giocato un ruolo primario facendosi aria, luce, atmosfera, vibrazione fisiologica e quindi anche psicologica.

Including x-rays of wood, which invokes landscapes, the variable rhythm and irregular cycle of the grain in wood composes a sequence of seascapes and landscapes, nocturnal at times, in thick fog or marked by direct wind or sun.

The mind draws climates and characters from different continents from the same x-ray. From real x-rays of real trees: one perceives the grain as desert dunes, the knots as solar and lunar bodies and cracks as landscapes in a storm; once again a real image is transformed through the unreal quotients of transported fantasy.

In Meneghetti's cycle of woods, colour plays a primary role, becoming air, light, atmosphere, physiological and therefore also psychological vibration.
